EXAMINER

WEST, LEWIS G

ART UNIT PAPER NUMBER

2681

DATE MAILED: 07/17/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	09/412,182	CANNON ET AL.
Examiner	Art Unit	
Lewis G. West	2681	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 10 May 2002.

2a) This action is **FINAL**. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-6 and 8-19 is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1-6 and 8-19 is/are rejected.

7) Claim(s) _____ is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on 10 May 2002 is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

11) The proposed drawing correction filed on _____ is: a) approved b) disapproved by the Examiner.

If approved, corrected drawings are required in reply to this Office action.

12) The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some * c) None of:

1. Certified copies of the priority documents have been received.

2. Certified copies of the priority documents have been received in Application No. _____.

3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).

a) The translation of the foreign language provisional application has been received.

15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

1) Notice of References Cited (PTO-892)

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.

4) Interview Summary (PTO-413) Paper No(s) _____.

5) Notice of Informal Patent Application (PTO-152)

6) Other: _____.

Response to Arguments

1. Applicant's arguments filed May 10, 2002 have been fully considered but they are not persuasive. Applicant argues that a cellular phone is not a cordless phone with a line interface. A cellular phone is inherently a cordless phone with a base unit (base station) that inherently has a wireline connection, making possible, for example, long distance phone calls in a cellular system. Applicant admits that the cited prior art discloses his method, the only argument being in regards to a line interface, and this argument is not persuasive.

Applicant further argues with regard to claim 5 that a cellular phone does not have a wireless interface. A cellular phone is also inherently and by definition a cordless phone with a wireless interface.

The previous rejection stands as no persuasive arguments have been presented.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Upon amending the claim, claim 12 now discloses a cordless handset with a telephone line interface; a telephone line interface as defined by applicant would make the phone no longer cordless. It is assumed for examination that there is a base with a telephone line interface.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 and 6-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Tendler (US 5,555,286).

Regarding claim 1, Tendler discloses a cordless (cellular) telephone comprising a base unit (cell site), with a telephone line interface, and a handset, the handset including a keypad, a key scan element adapted to scan the keypad for a predetermined key sequence, and a controller adapted to cause the initiation of an outgoing call based on a determination of the predetermined key sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 2, Tendler discloses a cordless telephone wherein the outgoing call is initiated to a telephone number corresponding to the predetermined key sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 3, Tendler discloses a cordless telephone wherein the predetermined sequence is 9-1-1. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 4, Tendler discloses a cordless telephone wherein the base unit is adapted to establish a link with a network based on a signal from the controller in the handset, to sense a dial tone and to output dual tone multifrequency (DTMF) signals corresponding to a number to be dialed to the network. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 6, Tendler discloses a handset for a cordless (cellular) telephone comprising a keypad, a key scan element adapted to scan the keypad for a predetermined key sequence, and a controller adapted to cause the initiation of an outgoing call to a base with a telephone line interface based on a determination of the predetermined key sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 7, Tendler discloses a handset wherein the controller is adapted to output a signal to a corresponding base unit based on the determination of the predetermined key sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 8, Tendler discloses a handset, further comprising an RF transceiver, wherein the signal is output to the base unit via the RF transceiver. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 9, Tendler discloses a handset wherein the signal informs the base unit that the predetermined key sequence has been detected. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 10, Tendler discloses a handset wherein the signal comprises a dialing sequence of a number to be dialed. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 11, Tendler discloses a handset wherein the dialing sequence corresponds to the predetermined key sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 12, Tendler discloses a method of placing a telephone call from a cordless telephone handset, having a telephone line interface, that is in an on-hook condition,

comprising the steps of: sensing the activation of a predetermined key sequence and initiating a telephone call based on the sensed activation. (Figure, col. col. 7 lines 66- col. 8 line 4) (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 13, Tendler discloses a method wherein the telephone call is a telephone number corresponding to the predetermined key sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 14, Tendler discloses a method wherein the predetermined key sequence is 9-1-1. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 15, Tendler discloses a method wherein the initiating step includes sending a signal to a corresponding base unit. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 16, Tendler discloses a method wherein the signal indicates detection of the predetermined key sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 17, Tendler discloses a method wherein the signal includes a dialing sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 18, Tendler discloses a method wherein the dialing sequence corresponds to the predetermined key sequence. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Regarding claim 19, Tendler discloses a method wherein the signal is sent via an RF link. (Figure, col. 2 lines 31-45, col. 5 lines 11-26)

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tendler et al.

Regarding claim 5, Tendler discloses a device that may be used with a landline network using DTMF. (Col. 8 lines 5-14) Examiner takes official notice that would have been notoriously well known in that art at the time of the invention that a PSTN is a landline network using DTMF.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Armbruster et al. (US 6,070,065), Miller (US 5,896,565) and Zicker et al. (US 5,535,260) all disclose cordless phones with bases connected to telephone lines that detect dialing sequences.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lewis G. West whose telephone number is 703-308-9298. The examiner can normally be reached on Monday-Thursday 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dwayne Bost can be reached on 703-305-4778. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9314 for regular communications and 703-872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-0377.
